Solutions Manual For Cost Accounting A Managerial Emphasis 15th Edition by Horngren

CHAPTER 2 AN INTRODUCTION TO COST TERMS AND PURPOSES

Link download full: <https://getbooksolutions.com/download/solutions-manual-for-cost-accounting-a-managerial-emphasis-15th-edition-by-horngren>

2-1 A *cost object* is anything for which a separate measurement of costs is desired. Examples include a product, a service, a project, a customer, a brand category, an activity, and a department.

2-2 Direct costs of a cost object are related to the particular cost object and can be traced to that cost object in an economically feasible (cost-effective) way. Indirect costs of a cost object are related to the particular cost object but cannot be traced to that cost object in an economically feasible (cost-effective) way.

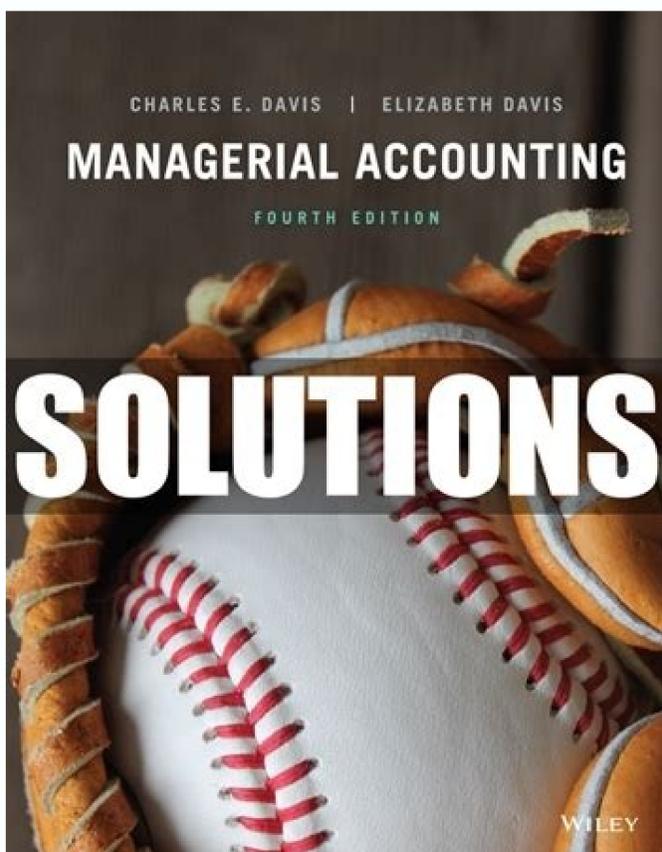

Cost assignment is a general term that encompasses the assignment of both direct costs and indirect costs to a cost object. Direct costs are *traced* to a cost object, while indirect costs are *allocated* to a cost object.

2-3 Managers believe that direct costs that are traced to a particular cost object are more accurately assigned to that cost object than are indirect allocated costs. When costs are allocated, managers are less certain whether the cost allocation base accurately measures the resources demanded by a cost object. Managers prefer to use more accurate costs in their decisions.

2-4 Factors affecting the classification of a cost as direct or indirect include

- the materiality of the cost in question
- available information-gathering technology
- design of operations

2-5 A *variable cost* changes in total in proportion to changes in the related level of total activity or volume. An example is a sales commission that is a percentage of each sales revenue dollar.

In general, most legitimate brokers are SIPC members. If, for example, the intermediation where you have opened your account suddenly suddenly bankrupt, the SIPC would refund the money you had in your brokerage account eAAA as long as that brokerage was an SIPC member. That said, it's vital to understand that the SIPC cannot protect you against poor investment decisions. But some apply to more than one heading and are listed accordingly. Manager's ability to monitor status of the sales process is also described in this group. If you deposit \$100, for instance, and invest it all in stocks, then to buy additional stocks you'll need to either deposit more money or sell one of your current investments. Margin Accounts Margin accounts are sort of like the credit cards of the investing world in that they allow you to trade with money that isn't yours initially. Most Guides are listed under only one heading. As with customers and the sales process, purchasing processes can vary. The SIPC is important because it's almost like a form of insurance for brokerages. Understanding the difference is very important, as each comes with a different level of risk. These make the program fairly intuitive to use. Read Guides in the Overview section first to see which capabilities you want to use.
